

BROKIS

# BROKIS Price list 2019

SRP (Suggested Retail Price), VAT Excl.

**EUR**

Valid from 8. 4. 2019

## GENERAL SALES CONDITIONS

- SRP (Suggested Retail Price ), VAT Excl.
- Standard lead time 4–6 weeks (does not apply to custom orders). Orders of large quantities or with due payment may have longer lead times.
- Payment by bank transfer according to the invoice and the agreed payment conditions

## IMPORTANT REMARKS

- In e-mail correspondence concerning an order or a claim, please always use the BROKIS case-number in the subject of the e-mail (CSxxxxx)
- Standard cable length for all pendent collections is 2.2 m. Longer cable lengths are available for a surcharge. The Muffins pendent and Jack o'Lantern pendent collections have 2.2 m length of steel wire; the cable is 3 m in length. Exceptions are the Mona, Knot, Puro, Big One and Ivy collections, for which the client must specify the exact drop length (from the ceiling to the bottom part of the light) when ordering. Drop lengths of 3m and more are subject to a surcharge.
- Table and floor lights are equipped with either a dimmer or a switch.
- Slight differences in colouration are inherent to the production of handblown glass, yet they must remain within tolerance. When ordering replacement glass for lights in any of the existing collections, we will make every effort to come as close as possible to your exact colour tone; however, we are not able to achieve precisely the same colour. BROKIS always requires a few photos of the particular colour shade on a white back-ground in order to best determine the colour.
- Please carefully read the cleaning instructions included in this price list.
- For a faster and easier ordering process or resolution of a claim, please use the MY BROKIS platform at [www.mybrokis.cz](http://www.mybrokis.cz).

## TRANSPORTATION AND CLAIMS

- When taking delivery of products from our forwarding companies, you will be requested to sign to a delivery confirmation document verifying you have received the consignment. Without your signature, the driver cannot release the products to you. Before signing the delivery confirmation document for the driver, we recommend you check all the boxes and the condition of the products.
- You can accept the products correctly in the following ways:
  1. If the boxes have visible damage, and you suspect that the products inside are also damaged, you have the right to refuse delivery.
  2. If the boxes are obviously damaged, but the condition of their contents is not recognizable from the outside, or if the products in the boxes are apparently broken, you can accept delivery, but you must describe the damage in writing in the delivery confirmation document.
  3. The boxes may be in good condition, but you are still entitled to make a claim with us for damage discovered after the driver has left. It is important that you inform us within a maximum of 5 days after receiving the goods; otherwise, we cannot proceed with the claim against the forwarding company. Any claims made with us beyond the five-day limit will be rejected.
- If the products have been damaged during transportation, please send photos of the damaged box(es), the pallet, all labels on the boxes, and the products inside the box(es) to [claim@brokis.cz](mailto:claim@brokis.cz).
- If you use Incoterms EXW, the CS number of the particular order must be provided by your driver to BROKIS staff at pickup. Without it, they are not authorized to release any products.
- Claims are accepted only with fully completed BROKIS official Claim Form and photos.

## **Cleaning BROKIS lights**

As with all products, BROKIS lights require periodic cleaning. Dust, grease, and filminess affect the visual quality of any item made of glass.

It is in the interest of the user to maintain the singular appearance of the lights. This can only be achieved through regular cleaning. When neglected, the cleaning process becomes unnecessarily time consuming. The cleaning interval depends on the environment the lights are installed in and is primarily influenced by humidity levels, temperature stability, and the amount of dust in the air.

BROKIS applies the highest possible quality standards in manufacturing its lights. Prior to shipping, each light undergoes several quality controls and stages of cleaning. Lights may require additional cleaning as a result of transportation, storage, and the amount of time that passes between packing in our plant and subsequent unpacking by the client. Therefore, we recommend cleaning the lights prior to installation.

## **Recommended cleaning methods**

When cleaning lights from any of our collections, we recommend first uninstalling them according to the instructions in the installation manual and then securing the glass components against mechanical damage.

The glass must first be rinsed in hot water, with a dilution of a dish-detergent or a de-greaser (such as ammonia or vinegar) used to remove all foreign particles, dust, and grease. Eventually repeat this basic treatment, if necessary. The glass is then thoroughly dried with a paper towel or a soft cotton towel.

Do not use mineral spirits, highly concentrated thinners, or other substances not intended for use on glass surfaces. Also: do not use products, containing silicones – since they will rapidly attract more dust and grease.

In order to keep the glass clean and shiny for as long as possible, we recommend using the 'BROKIS Post Treatment Kit', which can be purchased separately. Should you have any questions, please contact us at [info@brokis.cz](mailto:info@brokis.cz)
